Percentage: 89%

EXPERIENCE

Core Support Hub | Full Stack Web Developer   Bacolod City Negros Occidental, Philippines | June 2024 - Present

- **Developed a feature-rich website for Coresupport Hub**
  Utilized **Next.js** and **React** for a dynamic frontend and **Django** with **PostgreSQL** for a robust backend architecture. Hosted the application on Vercel for seamless deployment and scalability.
- **Contributed to the development of a Coworking Space Management System**
  Worked with **Laravel** for backend development and **jQuery** for an interactive frontend. Designed and optimized the systems **MySQL database** for efficient resource and user management.
- **Full-stack development of a SaaS Application**
  Collaborated in building a scalable SaaS platform using **Laravel** for backend services and **Vue.js** for responsive user interfaces. Ensured smooth database integration with **MySQL** and implemented features to enhance user experience and application performance.
- **Developed a Raffle Draw Management System with QR Code Integration**
  Designed and implemented a raffle draw system using **Laravel** and **jQuery**, featuring QR code generation for participant identification. Built and managed a secure **MySQL database** to store and retrieve participant data effectively.
- **Outsourced Software Tester**
  Assisted a software development company by conducting **functional, usability, and performance testing** for various applications. Delivered detailed bug reports and collaborated with developers to ensure high-quality releases.
- **Contributed to an ERP Project with CRM Module**
  Played a key role in the development of an ERP system with a CRM module using **ASP.NET** and **SQL stored procedures**, ensuring efficient data management and seamless integration of customer relationship processes.
