

RHEYAN JOHN BLANCO

Software Engineer

rheyanjohnblancogwapo@gmail.com, +639917584477 | Bacolod City, Philippines

SUMMARY

Software Engineer and Full-Stack Developer with experience building scalable SaaS and enterprise applications using Laravel, Next.js, React, Vue.js, PostgreSQL, and cloud technologies. Skilled in software development, system architecture, DevOps, CI/CD, Linux, and cloud infrastructure, with a strong focus on delivering reliable, maintainable, and production-ready solutions.

WORK EXPERIENCE

Technical Engineering Lead, Tikrr LLC

Jun 2026 – Present

- Promoted from Founding Engineer to Technical Engineering Lead, leading technical architecture, engineering strategy, and product development for Tikrr, a vertical SaaS ERP and AI platform for painting businesses.
- Architected and developed core ERP and AI capabilities using Laravel, PostgreSQL, Next.js, and OpenAI APIs, including CRM, estimating, operations, and AI-powered automation.
- Led cloud infrastructure, CI/CD, and engineering standards across Google Cloud and Firebase, driving platform scalability, reliability, and beta-launch readiness.

Full Stack Web Developer, Tikrr LLC

Nov 2025 – Jun 2026

- Architected and executed Tikrr's migration from a client-side architecture to a secure, scalable multi-tenant ERP platform, leading backend architecture with Laravel and PostgreSQL while developing the Next.js frontend and APIs.
- Designed modular multi-tenant architecture, tenant data isolation, RESTful APIs, and JWT authentication to securely support core ERP business operations.
- Established Docker-based environments and GitHub Actions CI/CD across Google Cloud VMs, maintaining end-to-end ownership of development, deployment, infrastructure, and third-party integrations.

Front End Web Developer, Tikrr LLC

May 2025 – Nov 2025

- Developed and maintained Tikrr's SaaS ERP frontend using Next.js and Firebase, delivering responsive, scalable, and user-focused web applications.
- Built core platform modules including the Estimator and Quote Management systems from the ground up, translating UI/UX designs into interactive and accessible interfaces.
- Designed reusable UI components and contributed to frontend architecture and technical decisions, improving maintainability, consistency, and development velocity.

VP of Global Technology, Click Global Talent

Jan 2026 – Present

- Led global technology operations, overseeing IT infrastructure, technical support, software development, and digital platforms supporting recruitment operations.
- Architected and developed the Click Match recruitment platform, enabling job seekers to manage applications and clients to create and manage job postings, alongside internal recruitment tools and workflows.
- Managed cloud infrastructure, integrations, deployments, and company systems, partnering with leadership to implement scalable technology solutions and improve operational efficiency.

Software Engineer, Akruals**Jun 2024 – Present**

- Owned frontend development and contributed to backend engineering for Akruals using Next.js, ASP.NET Core 10, and MySQL, with primary ownership of the CRM module.
- Designed and implemented authentication and subscription billing flows, ensuring secure and reliable user and subscription management.
- Contributed to technical decision-making and application architecture, helping shape scalable solutions across the platform.

Software Engineer, Core Support Hub**Jun 2024 – May 2025**

- Served as a primary developer and technical lead, owning architecture and implementation across multiple SaaS, ERP, automation, and client software projects.
- Architected and developed major platforms including a multi-tenant SaaS system, coworking management platform, and Unioil's nationwide QR raffle system supporting 250+ retail stores and ~100,000 entries.
- Delivered full-stack solutions across React/Next.js, backend services, SQL, authentication, subscriptions, and integrations, while collaborating cross-functionally and mentoring developers to drive successful implementations.

Software Engineer Consultant, Core Support Hub**May 2025 – Present**

- Provide software engineering and technical consulting across client projects, owning full-stack development, architecture, and technical implementation.
- Design and implement scalable, production-ready solutions, while advising on system architecture, technology selection, and development practices.
- Support and optimize existing applications through feature development, troubleshooting, maintenance, and performance improvements, collaborating directly with clients and cross-functional teams.

Software Engineer Intern, Core Support Hub**Jun 2024 – May 2025**

- Supported the development and maintenance of web applications and internal business systems, gaining hands-on experience in full-stack development and software engineering.
- Contributed to the Core Support Hub website and Orange Shire Customer Management System, implementing features for customer management, check-in/out, automated payments, and record management.
- Assisted with database integration, troubleshooting, and application support, collaborating with the development team to deliver reliable software solutions.

EDUCATION**Bachelor of Science in Information Systems****Aug 2020 – Jun 2024**

Carlos Hilado Memorial State University

- Minor in Systems Management

KEY SKILLS

- | | | |
|--------------------------|-----------------------|------------------------|
| • Full Stack Development | • Database Management | • Architecture and |
| • DevOps | • Mysql/Postgresql | Infrastructure Design |
| • CI/CD Integrations | • Git/Github | • Automation & |
| • Server Management | • Restful API's | Streamlining Workflows |
| (Linux) | • Vercel | |
| • GCP | • Supabase | |
